

Plan Name: UAPP Local #142 Profit Sharing Plan

Plan #: 108302

Good News! Your account is now available through MetLife's Interactive Voice Response system (IVR) and secure participant web site, www.retirelink.metlife.com

You can obtain information and request transactions through the IVR and web site virtually 24 hours a day, seven days a week! You will need both your Social Security Number and Personal Identification Number (PIN) in order to access these systems.

Initially, your PIN has been established as the last four digits of your Social Security Number. It is required that you change your PIN upon initial access through the IVR or web site. For security purposes, you should not share your PIN with anyone.

As directed by your Authorized Plan Representative, existing plan assets transferred to MetLife were invested in similar investment funds based on return and risk characteristics as well as the fund's objective. Your investment directions for future contributions were also transferred to MetLife in the same manner.

Now that the installation of your plan is complete, you may realign or transfer your existing fund account balances and/or your investment elections for future contributions.

Web Site Address: www.retirelink.metlife.com
